

Hello, I need to express you about issue of IP Number and VP number. You know that I and my friend have different D-link and sorensen. OF course they have different IP number. It's been hard on us to struggle to set up IP number in my program to call him with his VP number. It get really troubled with this situation. I sugguest that they should remove IP number. It would make easier to use our regular VP number like hearing's phone number. that's what I talk about it. thanks Billy
